## **CERTIFIED AUDITOR’S REVIEW REPORT**

### **To the Shareholders’ of “PLAISIO COMPUTERS S.A.”**

We have reviewed the accompanying interim financial statements and the consolidated financial statements of “PLAISIO COMPUTERS S.A.”, as of and for the six-month period ended 30 June 2006. These interim financial statements are the responsibility of the Company’s management. We conducted our review in accordance with the International Standard on Review Engagements, which is foreseen by the Greek Auditing Standards. Those Standards require that we plan and perform the review to obtain moderate assurance as to whether the interim financial statements are free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data, and thus provide less assurance than an audit. We have not performed an audit and, there for, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial statements are not presented fairly, in all material respects in accordance with the International Financial Reporting Standards that have been adopted by the European Union.

## **Notes to the Annual Financial Statements**

### **1. General information**

PLAISIO COMPUTERS S.A. (hereafter “The Company”) was founded in 1988 and is listed in the Athens Stock Exchange since 1999. The company’s headquarters are located in 5 Favierou Street, in Metamorphosi Attiki (Num. M.A.E 16601/06/B/88/13).

PLAISIO COMPUTERS S.A., together with its totally consolidated subsidiary PLAISIO COMPUTERS Bulgaria JSC (hereafter “The Group”) assembles and trades PCs, Telecommunication and Office Equipment. The subsidiary’s headquarters are located in Sofia of Bulgaria (Angel Kantcef 5).

On the 30<sup>th</sup> of June 2006 the employed personnel of the Company was 1.032 employees and of the Group 1.069 employees.

The Board of Directors of PLAISIO COMPUTERS S.A. approved the financial statements for the period ending on June 30<sup>th</sup> 2006 on the 24<sup>th</sup> of July 2006.

### **2. Basic Accounting Principles**

#### **2.1. Basis of Preparation of Financial Statements**

The Company’s and the consolidated financial statements of the period ending on June 30<sup>th</sup> 2006, have been prepared according to the principal of historical cost, the going concern principle and in accordance with the International Financial Reporting Standards (IFRS) that have been issued by the International Accounting Standards Board (IASB) and their interpretations which have been issued by the International Financial Reporting Interpretation Committee (IFRIC) of IASB.

All the fundamental accounting principles of the financial statements of December 31st 2005 have been observed in the interim financial statements of June 30<sup>th</sup> 2006.

The preparation of the financial statements according to the International Financial Reporting Standards requires the management to perform estimations and assumptions. All the important assumptions made by the Company's management for the application of the company's accounting methods and policies have been appropriately highlighted whenever this has been deemed necessary.

## **2.2. Basis of Consolidation**

The attached consolidated financial statements include the financial statements of PLAISIO COMPUTERS S.A. and its subsidiaries and affiliates. The companies that have been included in the consolidation are presented in note 3.3, along with the relevant percentages of participation, the method of consolidation and the country of incorporation and domicile of each subsidiary or affiliate.

### **Subsidiaries**

Subsidiaries are considered to be all the companies that are managed or controlled, directly or indirectly, by the parent company PLAISIO COMPUTERS S.A., either via the holding of the majority of voting rights of the company in which the investment took place, or via its dependence on the know how that is provided by the Group. In other words subsidiaries are the companies over which the control is exercised by the parent company. PLAISIO COMPUTERS S.A. acquires and exercises control via voting rights. The existence of any potential voting rights that are exercisable at the time of compilation of the present financial statements has been taken into consideration in order to determine whether the parent company exercises control over the subsidiaries.

Subsidiaries are fully consolidated with the purchase method from the day that the parent company acquires the right to control them and their consolidation ceases the day that the aforementioned control stops.

The acquisition of a subsidiary by the Group is accounted for by the purchase method. The acquisition cost of a subsidiary is the fair value of the assets, the shares issued and the liabilities undertaken on the date of the acquisition plus any costs directly associated with the transaction. The individual assets, liabilities and contingent liabilities that are acquired during a business combination are valued at their fair value regardless of the participation percentage. The cost of acquisition over and above the fair value of the individual assets acquired is recorded as goodwill. If the total cost of the acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the profit and loss statement.

Inter-company transactions, balances and unrealized profits from transactions between Group companies are written-off. Unrealized losses are also eliminated but are considered an impairment indicator of the asset transferred. Accounting policies of subsidiaries have been changed where necessary, in order to ensure consistency with the policies adopted by the Group.

## **Associates**

Associates are the companies over which the Group exerts significant influence, but cannot be classified as subsidiaries or joint ventures. Significant influence implies the holding between 20% and 50% of the voting rights of a company. The participations in associate companies are initially recognized at cost and are subsequently valued using the equity method. At the end of each period, the value increases by the proportion of the investing company in the changes of net equity of the associate and decreases by the dividends received from the associate.

## Group structure

The Group's structure at 30<sup>th</sup> of June 2006 is analyzed as follows:

Company	Country	Participation %	Relation to the parent company	Consolidation method
PLAISIO Computers S.A.	Greece	Parent company	Parent company	Full consolidation
PLAISIO Computers J.S.C.	Bulgaria	100%	Direct	Full consolidation
PLAISIO Estate S.A.	Greece	20%	Direct	Equity consolidation
PLAISIO Estate J.S.C.	Bulgaria	20%	Direct	Equity consolidation
ELNOUS S.A.	Greece	24%	Direct	Equity consolidation

During the 1<sup>st</sup> half-year 2006 there was no change in the participation percentage of the aforementioned companies in the Group's structure.

### 2.3. Segment reporting

A business sector is defined as a group of assets and operations engaged in providing products and services that are subject to risks and returns that are different from those of other business segments. The Group and the Company are organized into two main segments, office equipment and PC's and telecom applications. The segment results of the Group are presented in note 3.24.

A geographical segment is engaged in providing products and services within a particular economic environment (area) that are subject to risks and return that are different from those in other economic environments. For the first half-year of 2006, the great majority (over 98%) of the Group's turnover came from operations in Greece, which is considered as one geographical segment.

### 2.4. Conversion of foreign currency

#### Operating currency and reporting currency

Items included in the financial statements of the Group's companies are measured using the currency of the primary economic environment in which each company operates (operating or functional currency). The consolidated financial statements are presented in euros, which is the operating currency of the Parent Company.

### **Transactions and balances**

The transactions in other currencies are converted to euros using the foreign currency exchange rates prevailing at the transaction day. The receivables and obligations under foreign currency are adjusted in order to be in line with the foreign currencies that are in effect the day of preparation of the financial statements. The profits or losses that result from the adjustments of the currency differences are included in the profits (losses) from currency differences in the attached financial statements.

### **Group Companies**

The conversion of the financial statements of the companies of the group, which have an operating currency other than the one of the parent company, takes place as follows:

1. The assets and obligations are converted using the foreign exchange rate at the close of the balance sheet date.
2. Equity is converted using the foreign exchange rates that were in effect the date they came up.
3. Revenue and expenses are converted using the average rates of the period.

Any differences that may arise from the aforementioned process is being debited or credited to the equity for conversion of foreign subsidiaries' balance sheets in foreign currency. Goodwill and adjustments of the fair values that arise from obtaining foreign economic units are converted using the exchange rates at the date of the balance sheet.

### **2.5. Tangible fixed assets**

Tangible fixed assets are displayed in the acquisition cost, minus the accumulated depreciations as well as the possible accumulated devaluation losses. Acquisition cost includes all the direct expenses that the acquisition of these assets entailed.

Subsequent costs are added to the carrying value of the tangible fixed assets or are recognized as a separate fixed asset only if it is probable that future economic benefits, associated with the asset, will flow to the Group or to the Company and the cost of the asset can accurately be measured.

Depreciation of tangible fixed assets is calculated using the straight-line method over their estimated useful lives, as follows:

- Buildings: 30 years
- Vehicles: 5 – 10 years
- Other equipment: 3 – 6 years

Land as well as the fixed assets under construction is not depreciated. Improvements in leased real estates are depreciated based on the length of their lease contract.

The Group's management examines periodically the tangible fixed assets in order to ascertain any possible decrease in their fair value. If there are indications that the book value of a tangible fixed asset exceeds its recoverable value, then a provision is formed for loss from devaluation, so that the fixed asset's book value displays its recoverable value. Tangible fixed assets are written off from the balance sheet only when they are distributed or not expected to bring future economic benefits.

Gains or losses on disposals of tangible fixed assets are determined by comparing the proceeds with the residual value and are included in the profit and loss statement of the period.

## **2.6. Intangible Fixed Assets**

The intangible fixed assets concern mainly the cost of software as well as any expense that has been realized during the software development in order for it to be functional. The software depreciation is calculated using the straight-line method and within a period of 3 - 5 years.

After the initial recognition, the Group's management examines periodically the intangible fixed assets in order to find any possible decrease in their value. When facts or changes indicate that the book value of an intangible property may not be regained, a provision for loss from devaluation is formed so that the accounting value of the property displays its recoverable value. Tangible fixed assets are written off from the balance sheet only when they are distributed or not expected to bring future economic benefits.

## **2.7. Investments**

All the investments are initially recognized at cost, including market expenses that are related to the investment. After the initial recognition, the investments are classified according to the purpose for which they were purchased and the management re-examines the classification at each publication date.

### **Financial Assets Available for Sale**

The investments that are classified as available for sale are valued at their fair value. In the case that the fair value cannot be estimated reliably, the investment is valued at cost. Profits or losses from investments available for sale are posted as a special part in the net equity until the investment gets sold, settled, distributed or until there is an indication of devaluation. Then the above profits or losses are transferred to the income statement of the period.

For investments that are traded in organized markets, the fair value is determined through the current market prices, which are provided from these markets during the balance sheet closing date. For investments for which there is no stock market price, the fair value is determined based on the current market value of another financial item that is similar (similar risks and returns) or is calculated using the discounted cash flow method of the net equity of the issuer.

On the balance sheet date the management examines the investments in order to find any possible indications of devaluation of their value. When the value of the investment has come to a level that does not allow the retrieval of the invested capital in the near future a provision for devaluation is formed. The aforementioned provision is posted to the income statement of the period.

### **Financial Assets valued at fair value through the Profit and Loss Statement**

Financial Assets that were obtained with the main purpose of making profit through the variations at their price belong in this category. More specifically, in the aforementioned category are classified all the financial assets that have not been obtained for hedging purposes, the shares bought for speculation purposes and the investments have defined or definable installments, if the company does not intend to keep them until their expiration but to speculate from them. Variations at the fair value of the above elements are posted directly in the Profit and Loss Statement.

On June 30<sup>th</sup> 2006 the company owned 447 shares of the Greek Postal Savings Bank.

## **2.8. Inventories**

Inventories are valued at the lower value between cost and net realizable value. Cost is determined using the moving average price method. The cost of inventories does not

include financial expenses. The net realizable value is the expected selling price during the regular business proceedings, reduced by the calculated cost that is necessary for the sale to take place.

## **2.9. Trade receivables and other receivables**

Trade receivables are recognized initially at fair value (invoice value), less provisions for non-receivables (bad debt). Provision for doubtful receivables is conducted when there is objective evidence that the Group or the Company will not be able to collect all amounts due according to the terms of receivables. The doubtful receivables (bad debt) are written off against the formatted bad debt provision.

## **2.10. Cash and Equivalents**

Cash and cash equivalents include cash on hand, short-term bank deposits and other short-term highly liquid investments with maturity dates of three (3) months or less and insignificant risk.

## **2.11. Banking liabilities (loans)**

Banking loans are recognized initially at fair value, decreased by any transaction costs incurred. Subsequently, they are stated at amortized cost. Any difference between the proceeds and the redemption value is recognized in the profit and loss statement over the borrowing period using the effective interest method.

Loans are classified as short-term liabilities when the Group or the Company has the obligation to pay them back within twelve months from the date of the balance sheet. In the opposite case they are classified as long-term liabilities.

## **2.12. Income Tax (Current and Deferred)**

The period's income tax includes the current tax, the deferred tax and the provisions for unaudited tax periods. Income tax is recognized in the income statement of the period,

except for the tax relating to transactions that have been booked directly to equity, in which case it is, accordingly, booked to equity.

Current income tax concerns tax over the taxable profits of the companies that are included in the consolidation as restated according to the requirements of the tax law and calculated based on the current tax coefficient in effect in the countries where the subsidiaries are activated.

The deferred tax is calculated using the liability method, for all the temporary differences arising between the tax base and the accounting value of the assets and liabilities. The expected tax burdens from the temporary tax differences are calculated and displayed either as future (deferred) tax assets, or as deferred tax liabilities. The deferred tax is calculated based on the rates that applied on the date of the Balance Sheet.

Deferred income tax assets are recognized to the extent that is probable that future taxable profit will be available against which the temporary differences can be utilized. The book value of the deferred tax assets is restated in every balance sheet date and reduced in the degree that is speculated that there will not be enough tax profits charged with a part or the total of the deferred liabilities.

## **2.13. Employee Benefits**

### **Short-term benefits**

Short-term employee benefits, monetary and in items, are recognized as an expense when they accrue.

### **Benefits for employee compensation**

According to the Greek Law 2112/20 the company pays the employees compensations for dismissals or resignations due to pensions. The aforementioned payments depend on the years of working experience, the remunerations, and the way of leaving the company (dismissal or resignation). The compensations for pensions and dismissals fall under the defined benefit plans according to the IFRS 19 «Employee benefits». The above obligations are calculated based on an actuarial projected unit credit method. A program of specific benefits that operates taking into consideration various factors such as age, years of experience, remuneration and other specific obligations.

The provisions that concern the fiscal year, are included in the relative personnel cost in the attached consolidated financial statements and consist of the current and previous personnel cost, the relative financial cost, the actuarial profits or losses and any other possible charges. According to the IFRS 19, for the non-recognized actuarial profits or losses, the method of corridor approach is followed. IFRS 19 states that the profits and losses are systematically registered during the average employee working life.

The provision for personnel compensation for the current period, which is displayed in the results of the Group and the Company, is based on an actuarial study made by an independent actuarial company.

#### **2.14. Provisions and contingent liabilities, potential receivables**

The company forms provisions when:

- a. There is a legal or presumed obligation as a result of past events.
- b. Possible outflows encompass financial gains of the obligation settling.
- c. The amount of the relevant obligation can be reliably estimated.

The company's management reassesses the need of provisions at the date of the financial statement, and adjusts them so that they display the best possible estimations. In the case it is thought necessary; these are discounted based on a pre-tax rate.

Contingent liabilities are not posted in the financial statements, but are disclosed, unless the possibility of outflows that encompass financial gains is very small.

Contingent claims are not posted in the financial statements but are disclosed as long as the inflows of financial gains are probable.

## **2.15. Revenue and cost recognition**

### **Sale of goods**

Revenue from the sale of goods is recognized, after the deduction of possible discounts, when all significant risks and rewards of ownership of the goods are transferred to the buyer.

### **Sale of services**

Income from services is recognized in the accounting period in which the services are rendered, based on the stage of completion of the services provided in relation to the total services to be provided.

### **Interest income**

Interest income is recognized in the income statement on a time proportion basis using the effective interest method.

### **Dividend income**

Income from dividends is recognized when the right to receive payment is established.

### **Expenses**

Expenses are recognized when they accrue.

## **2.16. Dividend distribution**

Dividend distribution to the Company's shareholders is recognized as a liability in the financial statements in the period in which the Annual Shareholders' Meeting approves the distribution of these dividends.

## 2.17. Earnings per share

Earnings per share are calculated dividing the net profit of the period that corresponds to the holders of common stocks, with the weighted average number of the ordinary shares during the fiscal year. There have been no bonds or other potential titles convertibles in shares that reduce the profits during the period. Consequently, reduced profits per share have not been calculated.

## 2.18. Financial items

The financial receivables and the financial obligations in the balance sheet include cash, receivables, participations and investments as well as short-term obligations. The company does not use financial derivatives for hedging or speculative purposes. The accounting policies of recognition and devaluation of these elements are included in the relating accounting policies, which are presented in this note. The financial products are presented as assets, liabilities or elements of net equity based on their essence and content from which they stem. Interests, dividends, profits or losses that result from the financial products (assets or liabilities) are posted to the income statement. The financial products are offset when the company, according to the law, holds the legal right and intends to offset them on a clear basis (between them) or to retrieve the financial element and offset at the same time the obligation.

**I) Fair Value:** The amounts displayed in the attached balance sheets for the cash, receivables and short-term obligations, approximate their respective fair values due to their short-term expirations.

**II) Credit Risk:** The Group has no significant credit risk, mainly because of the large dispersion of its customers. Retail sales are paid in cash or credit cards. For wholesales the Group has the necessary policies in order to ensure that

sales are made to customers with an appropriate credit history. Furthermore, the Groups receivables are insured.

**III) Foreign exchange risk:** The majority of the Group's transactions and balances is in Euro. Therefore the management estimates that the Group is not exposed to foreign exchange risks. The management will observe the foreign currency risks that may arise and will evaluate the need for relevant measures.

**IV) Interest rate risk:** The management observes the interest rate fluctuations and the financing needs of the Group. The type (fixed or variable interest rate) and the duration of each loan depend on the financing need, which is planned to cover.

**V) Liquidity Risk:** The Group has adequate working capital and approved credit limits by credit institutions so as to minimize liquidity risk. The group's policy is to take advantage of discounts provided by suppliers for cash payments (cash discounts) throughout the year as it has low cost credit lines available from the cooperating banks.

**VI) Inventory Risk:** The Group takes all the necessary measures (insurance, safekeeping) so as to minimize the risk and contingent damages due to physical disasters, thefts etc.

<b>Total short-term provisions</b>		<b>288</b>	<b>651</b>	<b>288</b>	<b>651</b>

(a). The Company had formed a provision of € 200 thousand for each unaudited period. During Q2 2006 the tax audit was completed for the periods 2003, 2004 and 2005, as a result the Company reversed the provision it had formed concerning the aforementioned periods given that the differences were finalized. The provision of € 100 thousand, which is depicted in the Financial Statements of June 30<sup>th</sup> 2006, is in the event additional taxes are imposed concerning the first half-year 2006. Concerning the other companies of the group, no such provision has been formed on the basis that any extra burden will be non-material. The unaudited tax periods are presented in note 3.20.

(b). The Company has formed a provision for restoring the stores in their primary condition according to the lease contracts. The provision is reevaluated each time a new store is leased or there is an adjustment in the terms of the existing stores.

(c). The Company has formed a provision for the copyright fees that should be paid, based on the relevant regulations for the importers / manufacturers of digital products, electronic storage means, copy paper and specific office machines in the relevant organizations of total control. The aforementioned copyrights are calculated in 4% and 6% on the import invoice values.

(d). The Company has formed provision of total amount of € 86 thousand for computer guarantees given to its customers. The provision is revaluated at the end of every fiscal year.

(e). The Company had formed provision for recycling fees, according to the Greek Law 2939/2001, for the distributors of computer and electronic equipment. The provision concerned the second half-year 2004 and the full-year 2005. During Q2 2006, the amount of the recycling fee (Law 2939/2001) for the periods 2004 and 2005 were finalized, as a result the company reversed the provision that was formed.

### 3.27. Reclassification of figures

Some figures of the Income Statement of the first half-year 2005 of the Company and the Group, which are presented as reference to the income statement of the first half-year 2006, have been reclassified resulting to differences from the figures initially published. The above-mentioned reclassifications have been made in accordance to IAS 8 in order to make the figures of the first half-year 2005 comparable to those of the current quarter. These reclassifications do not alter the Net Profits after Taxes, the Profits per share and the Net Equity of the Company and the Group. More specifically, the reclassifications of figures in the Income Statement of the first half-year 2005 refer to the following:

1. The sales of the Company and the Group have increased by 42 thousands € while the Other Income has decreased by the same amount. This was due to the reclassification of the income from furniture assembly and delivery goods to customers from the Other Income to the Sales Turnover.

2. Income tax expense for the Company and the Group has increased by 100 thousands € while the administration and distribution expenses have decreased by the same amount. This was due to the reclassification of the provision for unaudited tax periods from the administration and distribution cost to the income tax cost.

The following tables provide a detailed analysis of the above-mentioned reclassifications.
